

A 3D rendered scene of a humanoid figure standing in a vast, arid desert landscape. The figure is seen from behind, wearing a light-colored, form-fitting suit with dark, circular patterns on the back and arms. The landscape features rolling sand dunes, sparse desert vegetation, and a dramatic, cloudy sky. The overall color palette is warm and monochromatic, dominated by shades of brown and orange.

DARIA LYTVIN

Cinematic worlds for real-time experiences.

PORTFOLIO / 2026 / GERMANY

I build worlds players can believe in.

3D Environment Artist focused on cinematic aesthetics and large-scale world-building. My work spans asset creation, UV mapping, PBR texturing, lighting and final scene composition in Unreal Engine 5.

REAL-TIME ENVIRONMENTS - ASSETS - LIGHTING - COMPOSITION

Environment study

A sun-scorched desert environment built around large-scale terrain silhouettes, layered dune formations, and a cinematic play of heat, shadow and distant haze.

TOOLS

UE5 / GAEA / BLENDER / SUBSTANCE

MOUNTAINS

ENVIRONMENT STUDY - 2026

Environment study

A large-scale mountain environment exploring terrain scale, atmosphere and distant haze, with a focus on cinematic composition and real-time readability.

TOOLS

UE5 / GAEA / BLENDER

Let's create a world worth remembering.

Available for environment art, scene composition, lighting and real-time world-building collaborations.
